

Web Developer - qualtrics.com

Need a summer job? Need a local internship to boost your resume? Come join our team of web developers at Qualtrics! We have positions available for working anywhere from 20-40 hours/week. For details, see below:

Paid internship positions at a well-established and rapidly growing Internet company. Position includes maintaining/optimizing existing code and organizing content for a web-based data collection/analysis application. Other tasks may include writing a testing suite and implementing new features. This is an ideal position for a motivated high school or college student to gain real-world programming experience.

Candidate must have prior programming experience including web design. Related prior employment is not necessary if the candidate is well motivated and willing to learn and adapt. The candidate must be able to read and understand existing code and is expected to write clean and understandable code. The candidate must have experience developing web content without the use of an authoring tool (Dreamweaver, Frontpage). Prior knowledge of CSS-based layout and some experience with PHP and Javascript is required.

Required Skills:

XHTML/CSS
PHP
JavaScript

Desired Skills:

Eclipse IDE
JSON
Prototype JavaScript framework
Scriptaculous
Smarty (PHP template engine)
SQL (MySQL)
Subversion (SVN)
Adobe Photoshop/Illustrator

Company Location:

Provo, UT

Company Website:

www.qualtrics.com

Send a resume and portfolio (if available) to Broderick at: broderickg@qualtrics.com
