The State of Customer Experience Management, 2019

BENCHMARK OF CUSTOMER EXPERIENCE ACTIVITIES, COMPETENCIES, AND MATURITY LEVELS

By Bruce Temkin, CCXP
Head of the Qualtrics XM Institute

Maggie Mead
Research Associate

July 2019
EXECUTIVE SUMMARY

To understand the current state of customer experience (CX) management, we surveyed 212 large companies with at least $500 million in annual revenues. Respondents not only answered questions about their organizations’ CX efforts, they also completed our CX Competency & Maturity Assessment, which evaluates the six experience management (XM) Competencies: LEAD, REALIZE, ACTIVATE, ENLIGHTEN, RESPOND, and DISRUPT. When we analyzed their responses, we found that:

- Although CX correlates to loyalty, companies still deliver mediocre experiences to their customers. It’s no surprise, therefore, that companies intend to focus more on CX in the coming year than they did last year. They also expect to focus more on the other three core experiences: employee experience, brand experience, and product experience.

- About two-thirds of respondents have a senior CX leader and a centralized CX team in place. Of those organizations with a centralized team, one-third have 11 or more full-time CX employees.

- When we asked companies to evaluate the customer experience they deliver across channels, they rated on the phone with an agent and in a store/branch the highest and via chatbots and across multiple channels the lowest.

- Only six percent of companies have reached the two highest levels of CX maturity, while 79% remain in the lowest two stages. The most common obstacle organizations encounter as they try to mature their CX is other competing priorities.

- Compared with their peers, CX leaders enjoy better financial results, have stronger CX leadership, focus more on employee engagement, and foster more empathetic cultures.

CUSTOMER EXPERIENCE MANAGEMENT WITHIN LARGE FIRMS

Our research shows that although customer experience (CX) is highly correlated to customer loyalty, very few companies currently deliver excellent CX (see Figure 1).¹ To understand the present state of companies’ CX management efforts, we surveyed 212 CX professionals from large companies.² The results of this survey show that:

¹The 2019 XM Institute Customer Benchmark is based on a survey of 10,000 U.S. consumers and evaluate almost 300 companies across 20 industries.
²The Qualtrics XM Institute conducted this survey in June 2019. The data was cleansed to eliminate partial, duplicate, and questionable responses. This report analyzes 212 responses from companies with annual revenues of at least $500 million. These respondents come from a global set of companies.
- **Companies plan to increase their focus on CX.** Eighty-one percent of respondents expect their organizations to focus more on CX over the next 12 months than they did the previous year, while only four percent expect their organizations to focus on it less (see Figure 2). Companies are planning to concentrate more on their other core experiences as well. For instance, more than three-quarters of respondents consider it at least “moderately important” to improve their employee experience at the same time as they’re improving their customer experience.

- **Most have centralized CX leadership.** We found that 65% of respondents have a senior executive in charge of CX across products and channels, while 69% have a centralized CX group (see Figure 3). More than two-thirds of the companies have had these corporate elements in place for 12 months or more.

- **Most CX team have fewer than 10 FTEs.** Forty-five percent of respondents report that their CX efforts are significantly coordinated across their organization (see Figure 4). Of the companies with centralized CX teams, the median firm has six to ten full-time CX employees. One-third of respondents have 11 or more full-time CX employees.

- **Humans deliver the best experiences.** When we asked respondents to evaluate the experiences they deliver across multiple channels, the two experiences they rated most highly were *on the phone with an agent* and *in a store/branch* (see Figure 5). Conversely, respondents gave *via chatbots* and *across multiple channels* the lowest ratings.

- **Companies struggle most with competing priorities.** What challenges do companies typically encounter as they work to improve their CX? Fifty-nine percent of respondents identified *other competing priorities* as a significant obstacle to their CX efforts (see Figure 6). The next most frequently cited obstacles are *limited funding* (48%), *conflict across internal groups* (47%), and *lack of a clear customer experience strategy* (45%).

### ASSESSING THE SIX XM COMPETENCIES

The Qualtrics XM Institute has identified six XM Competencies – LEAD, REALIZE, ACTIVATE, ENLIGHTEN, RESPOND, and DISRUPT – that organizations must build in order to deliver consistently positive, targeted experiences to their customers (see Figures 7 and 8).

As organizations master these six Competencies, they will evolve through five stages of XM maturity. In this report, we asked respondents a series of questions from the CX version of our *XM Competency & Maturity Assessment* (see Figure 9). The results show:

- **Few companies have mature CX programs.** Only 6% of respondents have made it into *Scale or Embed*, the top two stages of CX maturity (see Figure 10). And while companies have a lot of work to do in CX across all six XM Competencies, they received the lowest ratings in DISRUPT.

- **Companies are infusing CX insights into their processes and systems.** To identify where companies’ CX efforts excel (and where they fall down), we examined their responses to questions about the 20 CX skills. The most commonly practiced Skill – with 32% of companies saying they do it consistently at an effective level – is *Process Integration*, which is about infusing CX and operational insights into key operating processes and systems (see Figure 11). The least developed Skills – with only 8% of

---

3 See the XM Institute report, “Operationalizing XM,” (July 2019).
companies saying they do them consistently at an effective level are Metrics Management, which is about identifying metrics and using them to drive priorities, and Strategic Decision-Making, which is about using CX insights to make important, strategic decisions (see Figure 12).

COMPARING CX LEADERS AND LAGGARDS

How do CX leaders differ from their less mature peers? To analyze this question, we split the respondents into two groups based on their CX Competency & Maturity Assessment scores. We labeled companies with scores of 48 and above “CX leaders” and companies with scores below 48 “CX laggards.” When we compared the results of these two groups, we found that CX leaders:

- **Enjoy stronger financial results.** Seventy-one percent of CX leaders report that their CX efforts had a positive impact on their financial performance over the previous year, while only 38% of CX laggards report the same (see Figure 13). In addition to seeing more value from their CX efforts, CX leaders also tend to outperform their peers financially, with 61% saying they have better financial results than their competitors, compared to only 48% of CX laggards.

- **Have more senior executive support.** Fifty-seven percent of CX leaders consider their most senior leader, such as their CEO, to be a “strong” or “very strong” champion of CX, compared with only 38% of CX laggards (see Figure 14). In addition, 28% of CX laggards describe their senior executive as either a “weak” champion, a “very weak” champion, or “not a champion at all,” which is twice the percentage found in CX leaders.

- **Have more coordinated CX programs.** Sixty-four percent of CX leaders report having significant CX efforts underway across the company with significant coordination across these efforts, compared to only 26% of CX laggards.

- **Are focused across multiple core experiences.** Sixty-five percent of CX leaders consider it “very important” or “critical” to improve employee experience while they are improving CX, compared to only 48% of CX laggards (see Figure 15). CX leaders also reported having better competitive positioning for their brand, employee, and product experiences.

- **Foster a more empathetic culture.** When we asked respondents how effectively their company demonstrates certain cultural attributes, CX leaders were more likely to “mostly agree” or “completely agree” with every statement on our list (see Figure 16). The two groups differ the most when it comes to the statement our organization demonstrates empathy for its customers, with 80% of CX leaders agreeing compared to only 37% of CX laggards.

- **Deliver better experiences across all channels.** CX leaders report delivering a higher percentage of “good” and “very good” experiences across every interaction channel we surveyed (see Figure 17). Leaders and laggards diverge most when it comes to the experience they deliver in mobile apps, online self-service, and online chats.

- **Have stronger leadership and clearer CX strategy.** When asked about significant obstacles hampering their CX efforts, CX leaders and CX laggards equally cited struggling with other competing priorities (see Figure 18). CX laggards, however, were more likely than CX leaders to select almost all of the other obstacles on our list. The
two obstacles CX laggards were most likely to select compared to CX leaders are *wrong people are leading the effort* and *lack of a clear CX strategy*.

**ASSESSING YOUR CUSTOMER EXPERIENCE COMPETENCY**

As some organizations focus on the six XM Competencies more than others, we expect to see the gap between CX leaders and CX laggards to continue to grow. To help gauge your organization’s progress on the CX component of its experience management journey, use the Qualtrics XM Institute’s *CX Competency & Maturity Assessment*. You can use this tool in a number of ways:

- **Self-assessments.** Take the test yourself and identify the strengths and weaknesses of your organization.

- **Group discussions.** Have multiple people complete the self-assessment and discuss the results as a group. Talk about the strengths and weaknesses identified as well as the areas of agreement and disagreement in the results.

- **Benchmarking.** Compare your results to the Qualtrics XM Institute’s data about how other companies perform. We’ve provided a chart you can use to identify how your score compares to the scores of 212 large companies (see Figure 19).

- **Action planning.** Develop plans for making progress towards mastering CX.

- **Progress tracking.** Repeat the self-test every six to twelve months to track your progress and identify your key areas of focus. The goal is to drive an ongoing discussion and continue prioritizing CX efforts.

The Components of XM Maturity

Six XM Competencies

- Lead: Architect, align, and sustain successful XM efforts.
- Disrupt: Identify and create experiences that differentiate the organization.
- Respond: Prioritize and drive improvements based on insights.
- Activate: Provide actionable insights across the organization.
- Realize: Track and ensure that XM efforts achieve well-defined business objectives.
- Enlighten: Equip the organization with the appropriate skills, support, and motivation to achieve desired XM results.

Five Stages of XM Maturity

1. Investigate
   - The organization is not focused on XM as a strategic opportunity.

2. Initiate
   - As leaders see the potential value in XM, they investigate how XM can help their organization and kick off pockets of XM activities.

3. Mobilize
   - Once executives view XM as a strategic priority, the organization taps into full-time XM staff, who distribute insights and drive experience improvements.

4. Scale
   - With strong XM Competencies in place, the organization systematically uses insights to identify and improve experiences and invests in engaging the entire workforce.

5. Embed
   - In the final stage of maturity, XM Skills are ingrained across the organization, and experience is the basis for its ongoing differentiation.

Leadership and Organization, CX Leaders Versus CX Laggards

To what degree is your CEO (or the most senior leader in charge of your organization) a champion for customer experience?

<table>
<thead>
<tr>
<th>Champion Type</th>
<th>CX Leaders</th>
<th>CX Laggards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very strong champion</td>
<td>21%</td>
<td>14%</td>
</tr>
<tr>
<td>Strong champion</td>
<td>36%</td>
<td>24%</td>
</tr>
<tr>
<td>Moderate champion</td>
<td>29%</td>
<td>34%</td>
</tr>
<tr>
<td>Weak champion</td>
<td>18%</td>
<td>12%</td>
</tr>
<tr>
<td>Very weak champion</td>
<td>7%</td>
<td>0%</td>
</tr>
<tr>
<td>Not a champion at all</td>
<td>3%</td>
<td>2%</td>
</tr>
</tbody>
</table>

Which of the following best describes the customer experience efforts within your company?

<table>
<thead>
<tr>
<th>Efforts Description</th>
<th>CX Leaders</th>
<th>CX Laggards</th>
</tr>
</thead>
<tbody>
<tr>
<td>There are significant efforts underway across the company with significant coordination across them</td>
<td>64%</td>
<td>26%</td>
</tr>
<tr>
<td>There are significant efforts underway across the company with minimal coordination across them</td>
<td>31%</td>
<td>45%</td>
</tr>
<tr>
<td>There are limited efforts underway in different parts of the company</td>
<td>6%</td>
<td>29%</td>
</tr>
</tbody>
</table>
