

## PUBLIC HEALTH

# COVID-19 Pre-screen & Routing

Use this [free online resource](#) to provide accurate, up-to-date information to the public about the coronavirus, triage potential patients, and stay on top of community concerns.

**CURRENT STATE**

People are flooding public health and government organizations with phone calls seeking information on COVID-19 including questions about symptoms, community incidents, school and business closures, etc.

**THE PROBLEM**

Health organizations are overwhelmed by the sheer number of requests and lack the operational infrastructure to handle hundreds or even thousands of calls a day. This has resulted in:

- + An incredible strain on an already-taxed public health system, resulting in disorganized information, duplicative requests, and inefficient use of staffing resources
- + Difficulty obtaining the most accurate and up-to-date information - including those who may be exhibiting symptoms of COVID-19
- + Inability to track trending requests and patterns, which could inform external communication efforts and actions

**A SOLUTION**

Qualtrics has created a solution that any health or government organization can deliver in one of two ways:

- + Pre-screen only – collect information from people about their current symptoms and circumstances
- + Pre-screen and route people to information – collect information from people about symptoms and provide relevant, localized information to them

Automatically generated reports help to identify trends, patterns and information gaps.

# Benefits of the COVID-19 Pre-screen & Routing solution

## TRIAGE POTENTIAL PATIENTS

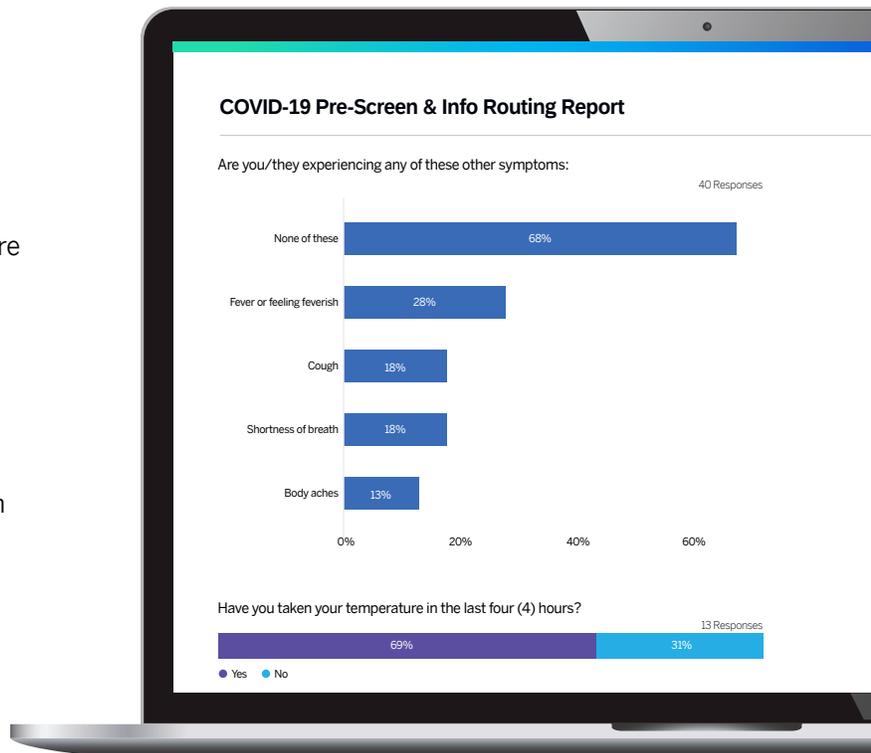

- + Segment respondents by self-reporting of COVID-19 symptoms
- + Proactively direct potential patients to the right local resources to get the appropriate testing/care
- + Track volume of self-reported cases over time

## REDUCE STRAIN ON PUBLIC HEALTH ORGANIZATIONS

- + Provide automated, self-guided answers and the right resources to address the most common questions from the public about COVID-19
- + Automatically direct the public to the most accurate, up-to-date information

## KEEP A FINGER ON THE PULSE OF COMMUNITY CONCERNS

- + Determine whether the information being provided is meeting the needs of the public
- + Understand the volume and percent of respondents experiencing COVID-19 symptoms
- + Understand trends in the type and volume of requests

**The COVID-19 Pre-screen & Routing solution is provided free of charge to federal, state, and local governments and public health organizations.**
