DATA SNAPSHOT

Global Study: ROI of Customer Experience

Bruce Temkin, CCXP, XMP
Head of Qualtrics XM Institute

Moira Dorsey, XMP
XM Catalyst

Talia Quaadgras
Senior Research Associate

April 2022
KEY FINDINGS IN THIS REPORT

As part of our latest global consumer study, consumers from 24 countries rated their recent experiences with 17 industries on a satisfaction scale of 1-5 stars and told us how likely they are to trust, recommend, and purchase more after that experience. From their responses, we examined the ROI of customer experience. Our analysis found that:

+ **Consumer satisfaction impacts key loyalty behaviors.** Satisfaction has a very strong correlation with consumers’ likelihood to trust, recommend, and purchase more.

+ **Consumer likelihood to recommend is most impacted by consumer satisfaction.** Compared to after a 1-2- star experience, after a 5- star experience consumers are 3.6x more likely to recommend, 3.3x more likely to trust, and 2.6x more likely to purchase more.

+ **The impact of satisfaction on loyalty metrics varies by country.** Chinese consumers’ likelihood to trust, recommend, and purchase more increases the least (1.7x) after a 5- star satisfying experience compared to after an unsatisfying experience. Comparatively, Germans’ likelihood to recommend increases by 6.3x, Spaniards’ likelihood to trust increases by 5.2x, and Italians’ likelihood to purchase more increases by 3.6x.

+ **Unsatisfying experiences impact government agencies’ loyalty metrics the most.** Across all industries, consumers are least likely to trust, recommend, and purchase more from a government agency after a 1-2- star experience. Consumers that had an unsatisfying experience with a supermarket are most likely to recommend and purchase more.

+ **Banks struggle the most with loyalty after satisfying experiences.** After 3-5- star experiences, banking consumers are least likely to recommend and purchase more from banks. Just 64% of banking consumers expect to purchase more after a 5- star experience, compared to 86% of online retail customers.
Global Study: ROI of Customer Experience

STUDY OVERVIEW

The data for this report comes from a global consumer study that Qualtrics XM Institute conducted in the third quarter of 2021. Using an online survey, XM Institute collected data from 24,000 consumers across 24 countries: Australia, Belgium, Brazil, Canada, China, France, Germany, Hong Kong, India, Indonesia, Italy, Japan, Malaysia, Mexico, the Netherlands, New Zealand, the Philippines, Singapore, South Korea, Spain, Thailand, the United Kingdom, the United States, and Vietnam.

XM Institute surveyed 1,000 consumers from each of the countries. To ensure that the data was reflective of the population within those countries, we set quotas for responses to match the gender, age, and income demographics of each country.

FIGURES IN THE REPORT

1. ROI: CX Correlates with Trust
2. ROI: CX Correlates with Recommending
3. ROI: CX Correlates with Purchasing More
4. CX and Loyalty Connections – Overall
5. CX and Trust Connections – by Industry
6. CX and Recommend Connections – by Industry
7. CX and Purchase More Connections – by Industry
8. CX and Loyalty Connections – Airlines
9. CX and Loyalty Connections – Banks
10. CX and Loyalty Connections – College / University
11. CX and Loyalty Connections – Credit Card Providers
12. CX and Loyalty Connections – Department Stores
13. CX and Loyalty Connections – Fast Food
14. CX and Loyalty Connections – Government Agency
15. CX and Loyalty Connections – Health Insurance
16. CX and Loyalty Connections – Hospital / Medical Clinic
17. CX and Loyalty Connections – Internet Service Provider
18. CX and Loyalty Connections – Mobile Phone Providers
19. CX and Loyalty Connections – Online Retailer
20. CX and Loyalty Connections – Parcel Delivery
21. CX and Loyalty Connections – Property Insurance
22. CX and Loyalty Connections – Public Utilities
23. CX and Loyalty Connections – Streaming
24. CX and Loyalty Connections – Supermarkets
25. CX and Trust Connections – by Country
26. CX and Recommend Connections – by Country
27. CX and Purchase More Connections – by Country

Methodology
ROI: CX Correlates with Trust

KEY TAKEAWAYS

+ With a Pearson correlation coefficient of 0.77, there is a very high correlation between customer experience (CX) and likelihood to trust.

ABOUT

This scatterplot contains a data point for each industry in each country. Each point represents the percentage of consumers from that country who said they were "somewhat" or "very" likely to trust a company in that industry and the percentage of consumers in that country who said they were satisfied (4- or 5-star rating on a 5-star scale) with their recent experience in that industry.

Industry satisfaction rates within each country correlate with likelihood to trust rates
24 countries across 17 industries, 385 data points

Pearson correlation coefficient = .77

Base: 24,000 consumers across 24 countries

ROI: CX Correlates with Recommending

KEY TAKEAWAYS

+ With a Pearson correlation coefficient of 0.86, there is a very high correlation between customer experience (CX) and likelihood to recommend.

ABOUT

This scatterplot contains a data point for each industry in each country. Each point represents the percentage of consumers from that country who said they were “somewhat” or “very” likely to recommend a company in that industry and the percentage of consumers in that country who said they were satisfied (4- or 5-star rating on a 5-star scale) with their recent experience in that industry.

Source: Qualtrics XM Institute Q3 2021 Global Consumer Trends Study
KEY TAKEAWAYS

+ With a Pearson correlation coefficient of 0.68, there is a high correlation between customer experience (CX) and likelihood to purchase more.

ABOUT

This scatterplot contains a data point for each industry in each country. Each point represents the percentage of consumers from that country who said they were "somewhat" or "very" likely to purchase more from a company in that industry and the percentage of consumers in that country who said they were satisfied (4- or 5-star rating on a 5-star scale) with their recent experience in that industry.

 Pearl correlation coefficient = .68
CX and Loyalty Connections – Overall

**KEY TAKEAWAYS**

- There is a **60-point** gap in the likelihood to trust between consumers who gave their recent experience a 5-star satisfaction rating and those who gave it a 1- or 2-star rating.

- There is a **62-point** gap in the likelihood to recommend between consumers who gave their recent experience a 5-star satisfaction rating and those who gave it a 1- or 2-star rating.

- Consumers are **2.6x** as likely to purchase more from a company after a 5-star experience compared to a 1- or 2-star experience.

**ABOUT**

The top of this chart shows, for all industries across all countries, the correlation between an individual’s likelihood to trust, recommend, or purchase more in a given industry and their satisfaction levels with a recent experience in that same industry. The bottom of this chart shows the percentage of consumers who said they are “somewhat” or “very” likely to trust, recommend, or purchase more according to their satisfaction ratings.

CX and Trust Connections – by Industry

KEY TAKEAWAYS

+ Consumers are most likely to trust department stores after a 1-3-star experience, and most likely to trust hospitals and medical clinics after a 4-5-star experience.

+ Consumers are least likely to trust government agencies after a very negative experience and are least likely to trust online retailers and mobile phone providers after middling experiences.

+ Internet service providers garner the least trust from consumers after a 5-star satisfactory experience.

ABOUT

This table shows the percentage of consumers who said they are “somewhat” or “very” likely to trust an organization in a given industry based on how they rated their satisfaction with a recent (within 90 days) experience in that industry.

### CX and Purchase More Connections – by Industry

#### KEY TAKEAWAYS

+ Banks are least likely to have their consumers purchase more after an experience of any star rating.

+ After 1-2- star experiences, consumers are least likely to purchase more from government agencies and banks, and most likely to purchase more from supermarkets.

+ Online retailers are most likely to have customers that purchase more after a 5-star experience.

#### ABOUT

This table shows the percentage of consumers who said they are “somewhat” or “very” likely to purchase more from an organization in a given industry based on how they rated their satisfaction with a recent (within 90 days) experience in that industry.

#### Percentage of consumers ‘somewhat likely’ or ‘very likely’ to PURCHASE MORE based on satisfaction rating

CX and Loyalty Connections – Internet Service Providers

KEY TAKEAWAYS

+ There is a **57-point** gap in the likelihood to trust between consumers who gave their recent experience a 5-star satisfaction rating and those who gave it a 1- or 2-star rating.

+ There is a **60-point** gap in the likelihood to recommend between consumers who gave their recent experience a 5-star satisfaction rating and those who gave it a 1- or 2-star rating.

+ Consumers are **2.5x** as likely to purchase more from a company after a 5-star experience compared to a 1- or 2-star experience.

ABOUT

The top of this chart shows, across all countries, the correlation between an individual’s likelihood to trust, recommend, or purchase more from internet service providers and their satisfaction levels with a recent internet service provider experience. The bottom of this chart shows the percentage of consumers who said they are “somewhat” or “very” likely to trust, recommend, or purchase more according to their satisfaction ratings.

Base: 24,000 consumers across 24 countries

# CX and Trust Connections – by Country

## KEY TAKEAWAYS

+ Chinese and Indian consumers’ trust increases the least after a 5-star experience compared to after a 1-2-star experience; they also are most likely to trust after a 1-2-star experience.

+ Filipino and Vietnamese consumers are most likely to trust after a 5-star experience, while Italian and Japanese consumers are least likely to trust after rating an experience as such.

+ Spanish consumers’ trust increases the most after a 5-star experience compared to after a 1-2-star experience, while Chinese consumers’ trust increases the least.

## ABOUT

This table shows, for each country, the percentage of responses from consumers who said they were "somewhat" or "very" likely to trust an organization in a given industry based on how they rated their satisfaction with a recent (within 90 days) experience in that industry. The final column shows how many times over consumers are likely to trust after a 5-star experience versus after a 1-2-star experience.

### Percentage of consumers ‘somewhat likely’ or ‘very likely’

to TRUST based on satisfaction rating

### KEY TAKEAWAYS

+ Chinese and Indian consumers’ likelihood to recommend increases the least after a 5-star experience compared to after a 1-2-star experience; along with Vietnamese consumers, they are also most likely to recommend after a 1-2-star experience.

+ Filipino and Thai consumers are most likely to recommend after a 5-star experience, while Japanese and German consumers are least likely to do so after a similarly rated experience.

+ German consumers’ propensity to recommend increases the most after a 5-star experience compared to after a 1-2-star experience, while Chinese consumers’ increases the least.

## KEY TAKEAWAYS

+ German and Japanese consumers are the least likely to purchase more after a 5-star experience.
+ Chinese and Vietnamese consumers have the highest propensity to repurchase after a 5-star experience, while German and Japanese consumers have the least propensity to repurchase after an experience with the same rating.
+ Italian consumers’ likelihood to repurchase increases the most after a 5-star experience compared to after a 1-2-star experience, while Chinese and Mexican consumers’ likelihood to repurchase increases the least.

### ABOUT

This table shows, for each country, the percentage of responses from consumers who said they were “somewhat” or “very” likely to purchase more from an organization in a given industry based on how they rated their satisfaction with a recent (within 90 days) experience in that industry. The final column shows how many times over consumers are likely to purchase more after a 5-star experience versus after a 1-2-star experience.

Base: 24,000 consumers across 24 countries

Source: Qualtrics XM Institute Q3 2021 Global Consumer Trends Study

DATA CALCULATION

Only industries with 100+ respondents who said they had an experience in that industry in the previous 90 days were included in the calculations for this report.

In Figures 1, 2, and 3, we calculated data points by taking, for each industry in each country, the average percentage of consumers who gave a 4- or 5-star satisfaction rating to an organization in that industry (satisfaction rate) and the average percentage of consumers who said they were “somewhat” or “very” likely to trust, recommend, or purchase more from that organization (likelihood to trust, recommend, and purchase more rate). We calculated Pearson correlation coefficients by correlating the satisfaction rate averages with trust, recommend, and purchase more rate averages.

In Figure 4, we developed the charts for each of the three loyalty behaviors by totaling the number of responses across all industries and countries where consumers said they were either “somewhat” or “very” likely to trust, recommend, or purchase more from an organization. For each of those three loyalty behaviors, we then divided those totals by the number of respondents who rated their satisfaction with recent experiences in that same industry as 1 or 2 stars, 3 stars, 4 stars, or 5 stars.

In Figures 5-7, we calculated the percentages for each of the three loyalty behaviors by first totaling the number of global responses where consumers said they were either “somewhat” or “very” likely to trust, recommend, or purchase more from an organization in each industry. For each of those three loyalty behaviors, we then divided those totals by the number of respondents who rated their satisfaction with recent experiences in that same industry as 1 or 2 stars, 3 stars, 4 stars, or 5 stars.

In Figures 8-24, the percentages in each chart come from the corresponding tables in Figures 5, 6, and 7. Key Takeaways for purchasing more were calculated by dividing the percentage of consumers who gave a 5-star satisfaction rating by the percentage who gave a 1- or 2-star rating.

In Figures 25-27, we calculated the percentages by, for each of the three loyalty behaviors, first totaling the number of responses from each country that indicated consumers were either “somewhat” or “very” likely to trust, recommend, or purchase more from an organization in a given industry. For each of those three loyalty behaviors, we then divided those totals by the number of respondents who rated their satisfaction with recent experiences in that same industry as 1 or 2 stars, 3 stars, 4 stars, or 5 stars.
