DATA SNAPSHOT

Experience Management Trends, 2024

James Scutt, XMP
Principal XM Catalyst

Talia Quaadgras
Research Program Manager

March 2024
KEY FINDINGS IN THIS REPORT

As part of Qualtrics XM Institute’s Q1 2024 Experience Management (XM) Professionals Study, we asked hundreds XM professionals about their planned XM investments, 2024 employee and customer experience priorities, and expected future usage of XM technologies. From our analysis, we found that:

**Two-thirds of organizations are in the second or third stage of XM maturity.** Two-thirds of practitioners described their organization’s state of XM Maturity as either Stage 2: Investigate, or Stage 3: Mobilize, at 33% each. Twelve percent say their organization is in the first stage of maturity (Investigate), while 5% have achieved the fifth stage: Embed.

**Trust is growing in importance, but many organizations still don’t measure it.** Sixty-nine percent of respondents said that customer trust will be more important to their organization’s success this year compared to last year, while 61% said the same about employee trust. Despite this increasing importance, only 21% measure customer trust monthly or more, while 24% don’t measure it at all.

**Organizations are investing more in XM technology and less in XM consultants.** Compared to last year, 30% of XM professionals expect their organization to invest more in XM technology, while 14% expect to invest less. XM consultants may expect a decrease in work this year, with 30% of organizations spending less on this resource and just 14% expecting to spend more.

**Those with higher XM ambition also enjoy stronger business results.** Compared to organizations’ whose business results are on par or worse than industry peers, those with stronger business results are more likely to have senior leaders with somewhat (+11 percentage points) or very high (+2 percentage points) ambition for improving the organization’s XM.
STUDY OVERVIEW

The data for this report comes from an XM professionals study that Qualtrics XM Institute conducted in the first quarter of 2024. Using an online survey, XM Institute collected data from 283 XM professionals from organizations with 1,000 or more employees.

XM Institute surveyed XM management professionals connected through our subscriber list for our monthly newsletter, through members of XM Pros (Experience Management Professionals community), and other professional networking sites.

FIGURES IN THE REPORT

1. Organization Demographics
2. XM Maturity
3. Previous Change in Focus on XM Areas
4. Future Focus on XM Areas
5. Importance of Customer Trust
6. Importance of Employee Trust
7. Organizational XM Technology & Competency
8. Organizational XM Culture & Ambition
9. 2024 Experience Management Resource Investments
10. 2024 Customer Experience Focus
11. 2024 Employee Experience Focus
12. 2024 Technologies Usage (Part 1)
13. 2024 Technologies Usage (Part 2)
14. XM Resource Investments by Business Results
15. Increased Technology Focus by Business Results
16. Customer Trust Measurement by Business Results
17. XM Ambition by Business Results

Methodology
More than half of respondents came from organizations with 10 or fewer employees dedicated to XM.

Forty-six percent of respondents have 10,000 or more employees in their overall organization.
Which of the following best describes your organization’s overall state of XM maturity?

- **Stage 1: INVESTIGATE** - 12%
- **Stage 2: INITIATE** - 33%
- **Stage 3: MOBILIZE** - 33%
- **Stage 4: SCALE** - 19%
- **Stage 5: EMBED** - 5%

**KEY TAKEAWAYS**

+ Just twelve percent of respondents say their organization is in the first stage of XM Maturity: Investigate.
+ Thirty-three percent of organizations are in each of the 2\textsuperscript{nd} and 3\textsuperscript{rd} stages of XM Maturity: Initiate and Mobilize.

Customer Trust Measurement by Business Results
XM Ambition by Business Results

What level of ambition does your organization’s senior leaders have for improving the organization’s XM capabilities?

- Very or somewhat high
  - Business results better than major competitors: 40%
  - Business results the same or worse than major competitors: 13%

- Somewhat high
  - Business results better than major competitors: 32%
  - Business results the same or worse than major competitors: 29%

- Neither high nor low
  - Business results better than major competitors: 33%
  - Business results the same or worse than major competitors: 32%

- Low
  - Business results better than major competitors: 14%
  - Business results the same or worse than major competitors: 25%

KEY TAKEAWAYS

 Organizations with somewhat and very high levels of XM ambition are also more likely to enjoy business results that are better than their industry competitors.

 Businesses with similar or worse business results than competitors are 11 points more likely to have leadership with low XM ambitions.

DATA CALCULATION

In Figures 1-13, we calculated each percentage by dividing the number of responses for each option by the total number of respondents for that question.

In Figures 14-19, we found the number of respondents who said their organization had somewhat or significantly better business results compared to its major competitors over the previous year and the number who said their organization had about the same, somewhat worse, or significantly worse business results. We then found the percentage of each population that also selected each statement with regard to the titled question(s).
